

# Disable & Enable Wireless on Laptops

Updated: December 10, 2013

---

## *Windows Laptop*

There are many hardware configurations available; please consult your manufacture documentation or contact IT Support. Most devices will fall into the following categories

- Hardware Switch or button – on / off
- Function Key Combination that will toggle on / off
  - Dell: Fn + F2
  - Lenovo: Fn + Fn
  - Asus: Fn + F2

## *Mac OS X Computers; Manual Method*

- From the **Apple** menu select **System Preferences**
- Click the **Network** icon
- From the drop down menu select Built-in Ethernet (wired), or Airport (wireless), as needed
